Guidelines & policy papers

The key results of the PVP4Grid project are presented in the following hands-on guidelines and recommendations:

Prosumer guidelines

Designed to answer the questions that are most frequently raised by potential prosumers during the design and implementation of a particular PV project. These have been developed at the national level in the national language. Additionally, an English summary that describes the national guidelines and offers an overview of the key issues regarding the latest EU legislation developments is also provided.

- English summary
- Austria
- Belgium
- France
- Germany
- Italy
- Portugal
- Netherlands
- Spain
