

PROSUMERS IN ROMANIA

Ciprian Glodeanu
RPIA President

March 30th, 2020

WHAT IS RPIA

- **The Romanian Photovoltaic Industry Association (“RPIA”)** is a professional association set-up in April 2012, having the purpose to represent the interest of the PV industry into the fast RES-E growing market in Romania.

PROSUMER LEGISLATION

(LAW 184/2018; ORDER 226&227/2018)

Primary legislation

- Prosumers are now defined - final clients which produce their own electricity, but their specific/commercial activity it's not generating electricity.
- Prosumers with an installed capacity below 27 kW can sell their surplus to their suppliers, the later being obliged to acquire this electricity at the DAM weighted average price for the past year.
 - The invoice settlement will be done between the value of the energy produced and the value of the energy consumed from the grid.
 - For the electricity produced and used for self-consumption, prosumers are exempted to acquire GCs and they are exempted from physical obligations (VAT).

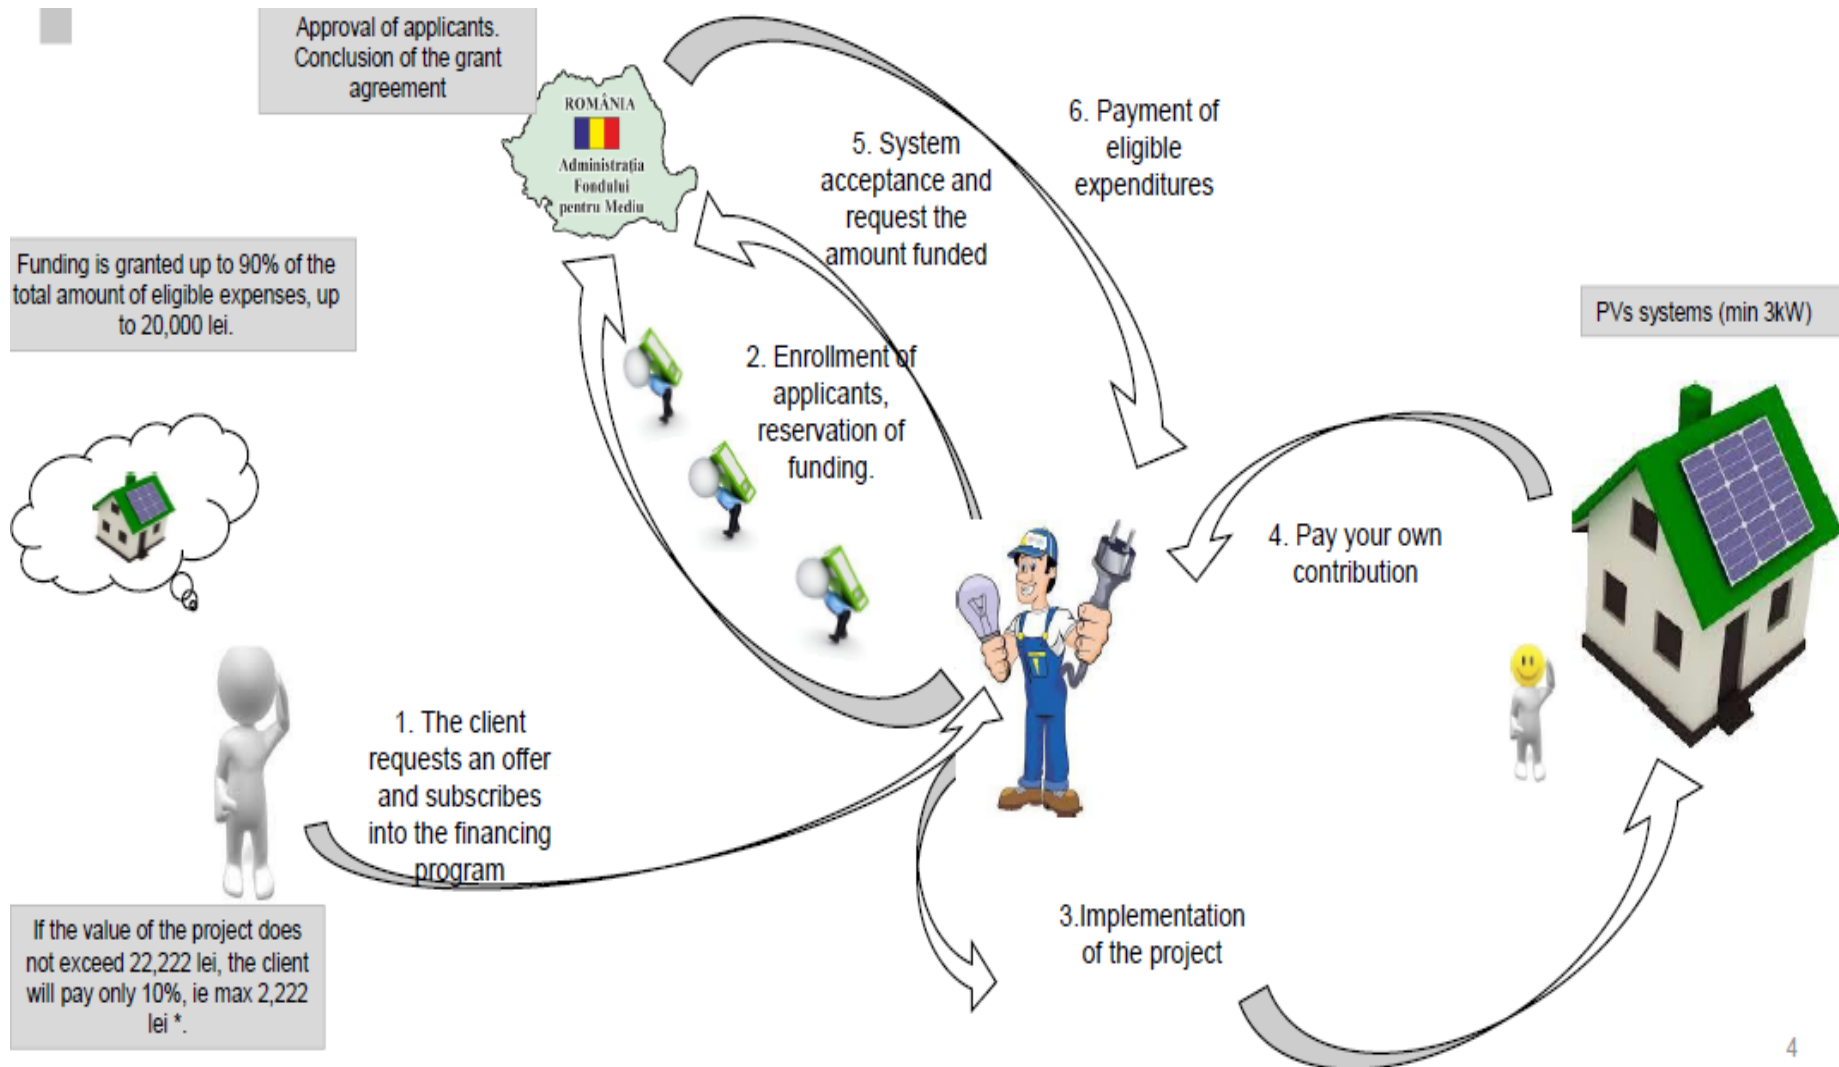

Secondary legislation

- Secondary legislation issued by ANRE (end of December)
 - Prosumers need to be certified by their DSOs, based on the installed equipment.
 - After obtaining the certification, prosumers can sign a contract with the supplier.

FINANCIAL PROGRAM FOR RESIDENTIAL CUSTOMERS – PROGRAM PRESENTATION

- The Environment Fund Administration (AFM) has launched a financing program for installation of PV panels for residential customers
- Estimated total budget for 2020 session : ~ 100 mil EUR
- Financed amount/project: maximum of 20.000 RON, representing max 90% of eligible costs
- Eligible cost components:
 - min 3kW PV systems (PV panels, inverter, structure, cables, comm., smart meter, electrical panel)
 - installation services, connection to the grid authorization & execution

FINANCIAL PROGRAM FOR RESIDENTIAL CUSTOMERS

* If the value of the project exceeds 20,000 lei, the client will pay the difference between the project value and the maximum recognized sum.

ELIGIBILITY CRITERIA AND NECESSARY DOCUMENTS

Applicant eligibility criteria

- Resides in Romania;
- Owns the house/terrain where the system is installed;
- Has no financial obligations to the state budget
- The building must not be the subject of a dispute in court, claim, or expropriation procedure;

Eligible expenditures

- Photovoltaic panels system min 3kW (photovoltaic panels, inverter, connection materials, system mounting structure, communication module, smart meter, electric panel).
- Assembly and commissioning of the system
- VAT on eligible expenditure

Documents required by the applicant

- Application for funding
- Applicant ID
- Land Book Extract, not older than 30 days
- Certificate of tax certification regarding payment obligations to the state budget
- Taxation certificate for local taxes and fees and other local budget revenues
- Tax Attestation Certificate on Local Taxes and Fees and Other Local Budget Income

Q&A

THANK YOU FOR YOUR ATTENTION!
